

PRESS RELEASE

Next class of the "Advanced Vehicle Insurance Expert Course" of CENTRO ZARAGOZA

On September 20th class number 56 of the "Advanced Vehicle Insurance Expert Course" of CENTRO ZARAGOZA will begin. The training system is "partially face-to-face" and the duration is of 443 teaching hours - from September 20th, 2017 to January 19th 2018.

Insurance companies and workshops demand new content that we offer our students to prepare them professionally. We constantly update the subject matter of the course to meet the needs of the market. This course has new theoretical and practical content in the field of driver assistance systems (ADAS).

The diplomas are issued by the "Cátedra Centro Zaragoza" of the University of Zaragoza, contributing to the generation of knowledge in the areas of the course and thus guaranteeing a thorough training of prestige and quality.

At the end of the course we facilitate the access of our students to the workforce through internships and job offers in expert offices, companies in the sector and important insurance companies.

From January 2016 to August 2017 we have received more than 120 job offers from companies throughout the country, requesting students from the expert course for their staff.

The objective of CZ is to enable the students by offering them solid training, adapted to the needs of the workforce, that serves as a basis for the effective application of good practices in the management of claims.

The course is subsidised through Fundae, State Foundation for Training in Employment.
